

TREMOL FP21

An improved version of the previous model TREMOL FP05-KL. One of the first certified fiscal printers which supports also the innovative functionality to issue fiscal receipts in electronic format. That makes it very suitable for sales reporting in electronic store without printing the receipt. The device is suitable also for all other businesses to print standard fiscal receipts.

The extremely speedy printing mechanism, large width of thermo-paper roll and attractive price make the device one of the best alternatives for your business. It supports various types of interfaces including LAN.
